

Please reject NAB's petition 04-160 as it is based on unfair competition. If the local radio stations can't get it right after all these years than it is time to let someone new try. The local radio stations play the same music over and over again because of some type of promotion or because they want to. With satellite radio you rarely hear the same song in a day or a week where as with local radio "the hot song/band" gets played at least 10 times a day. Allow satellite radio to do all it can to make listening to the radio more enjoyable.
